LLM

What evidence do we look for?

Events that may affect U.S. crude production, transportation, or refinery operations.

Why could this event matter?

Hurricane Beryl → Gulf ports / offshore platforms → U.S. crude operations → RWTC context

LLM Screen Questions

Time Role?
Operational Pathway?
Duplicate?
Evidence Strength?

A 2 Jul Forecast

REJECT

The storm was expected to disrupt Gulf oil operations
Reason: not an observed operational event

B 8 Jul Operational Affected

ACCEPT

Ports closed, offshore production shut.

Reason: confirmed physical operations impact

C 9 Jul Operations Restoring

ACCEPT

Operations restoring and refining effects limited.

Reason: bounds duration and materiality

D Price-centered recap

REJECT

The report only describes changes in the WTI price.
Reason: avoids circular causal labeling

Canonical Event

Hurricane Beryl disrupted Gulf oil operations 8-9 Jul 2024

Evidence

Port closures, crew evacuation, and temporary production shutdowns.

Series Relevance

External operational context for RWTC

Limitations

No claim that the hurricane caused the observed WTI price movement.

evidence incomplete
